**ABSTRACT**

**Background:** Comprehensive midwifery care includes a thorough physical examination, diagnostic laboratory tests, and psychosocial support. There are four continuous examinations in comprehensive midwifery care. They are intranatal, postnatal and neonatal care (Varney 2019).

**Case Report:** Comprehensive midwifery care was performed on Mrs S and her baby at Aliyang Health Center in 2023.

**Discussion:** This case report details complete midwifery care on Mrs S using descriptive case method at Aliyang Health Center and the patient's house. The comprehensive care commences from pregnancy to contraceptive installation.

**Conclusion:** Through midwifery management, comprehensive midwifery care has been wholly and procedurally conducted for Mrs S at Aliyang Health Center in 2023.

**Keywords:** comprehensive midwifery care, normal labor, newborns
