3. Kode program controller data kunjungan

```

app > Http > Controllers > Admin > DataKunjungan.php
23
238
239
240 {
241     $data = Query->orderBy('waktu_masuk', 'asc')->get();
242     $spreadsheet = new Spreadsheet();
243     $sheet = $spreadsheet->getActiveSheet();
244
245     // JUDUL
246     $sheet->mergeCells('A1:I1');
247     $sheet->setCellValue('A1', 'LAPORAN DATA KUNJUNGAN');
248
249     $sheet->mergeCells('A2:I2');
250     $sheet->setCellValue('A2', 'Periode: ' . $periode);
251
252     $sheet->getStyle('A1:I2')->getFont()->setBold(true);
253     $sheet->getStyle('A1')->getFont()->setSize(14);
254     $sheet->getStyle('A1:I2')->getAlignment()->setHorizontal('center');
255
256     // HEADER
257     $headers = ['No', 'Waktu Masuk', 'Nama Tamu', 'No HP', 'Instansi / Alamat', 'Jumlah Anggota', 'No Surat', 'Pegawai', 'Unit', 'Keperluan'];
258
259     $col = 'A';
260     foreach ($headers as $h) {
261         $sheet->setCellValue($col, $h);
262         $col++;
263     }
264
265     // STYLE HEADER
266     $sheet->getStyle('A1:I1')->getFont()->setBold(true);
267     $sheet->getStyle('A1:I1')->getAlignment()->setHorizontal('center');
268     $sheet->getStyle('A1:I1')->getFill()->setFillType(PhpOffice\PhpSpreadsheet\Style\Fill::FILL_SOLID);
269     $sheet->getStyle('A1:I1')->getStartColor()->setARGB('D9EAF7');
270
271     // DATA
272     $row = 5;
273     $col = 'A';
274     foreach ($data as $item) {

```

4. Kode program pengiriman email qr code

```

app > Mail > KirimQrCode.php
1 <?php
2
3 namespace App\Mail;
4
5 use Illuminate\Bus\Queueable;
6 use Illuminate\Mail\Mailable;
7 use Illuminate\Queue\SerializesModels;
8
9 class KirimQrCode extends Mailable
10 {
11     use Queueable, SerializesModels;
12
13     public $nama;
14     public $qr;
15
16     //ambil data dari controller
17     public function __construct($nama, $qr)
18     {
19         $this->nama = $nama;
20         $this->qr = $qr;
21     }
22
23     // isi email
24     public function build()
25     {
26         // QR dengan background putih + margin
27         $qr = "https://api.qrserver.com/v1/create-qr-code/?size=500x500&margin=20&bgcolor=255-255-255&color=0-0-0&data=" .
28             urlencode($this->qr);
29
30         return $this->subject('QR Code Ensur')
31             ->view('emails.qr-code')
32             ->with([
33                 'nama' => $this->nama,
34                 'qr' => $qr,
35             ]);
36     }

```
